PROFESSIONAL SUMMARY

Final-year Cybersecurity student with hands-on experience in cloud and infrastructure operations, IT service management and incident management within a 24/7 service operations environment. Practical knowledge of infrastructure monitoring and security tooling, with self-built projects in vulnerability scanning and security automation. Seeking opportunities in Security Operations and cybersecurity analysis.

EDUCATION

Bachelor of Computer Science (Hons) Cybersecurity | Nov 2022 – Present
Multimedia University (MMU), Cyberjaya | CGPA: 3.47 | Dean's List recipient three times

- Winner, Best Project Award (Cybersecurity) and Top 10 Finalist, Faculty of Computing & Informatics, Mar/Apr 2026
- Final Year Project: Design of a Cybersecurity Risk Assessment Tool for Organisational Systems

EXPERIENCE

Intern, Service Centre (Cloud & Infrastructure Operations Analyst) | 27 Jul 2026 – 18 Oct 2026
Logicalis Asia Pacific MSC Sdn Bhd, Cyberjaya

- Monitored 24/7 infrastructure environments using LogicMonitor, identifying potential issues and escalating confirmed alerts through ServiceNow.
- Managed incident, change, service request, and event management tickets in accordance with ITIL processes, ensuring timely updates and SLA compliance.
- Investigated and supported the resolution of infrastructure incidents across multiple priority levels, with primary exposure to P2 incidents, performing VM-level troubleshooting and following established escalation procedures.
- Coordinated infrastructure patching through change management, obtaining customer approvals, communicating pre- and post-maintenance updates and keeping customers informed by email and phone.

TECHNICAL SKILLS

Languages: Python, Bash, Go, C++, JavaScript, PHP, SQL
Security tools: Burp Suite, Nmap, Nuclei, SQLMap, Wireshark, Subfinder, HTTPX, Kali Linux
Security domains: Web application security, vulnerability assessment, reconnaissance automation, API security testing
Cloud and IT operations: Azure Portal (VM management), PowerShell, ServiceNow, LogicMonitor, ITIL
Frameworks and platforms: Django, Flask, React.js, Docker, REST APIs, Git
Databases: MySQL, SQLite, SQL Server, DB2

PROJECTS

VulnForge: Async Security Scanner CLI & REST API | Python, asyncio, SQLite, nmap | github.com/CyVenom/VulnForge

- Built an async, plugin-extensible vulnerability scanner running nmap, web, SSL/TLS, DNS and CVE checks in parallel, with risk scoring, false-positive reduction and reports in six formats (HTML, JSON, SARIF, PDF and more).
- Designed an offline CVE matching engine using the NVD API 2.0 and CISA KEV catalog, plus a token-authenticated REST API, an authorization-first workflow and a 60-test pytest suite.

VenomSec | Bash, Python, Telegram API | github.com/CyVenom/VenomSec

- Designed a modular offensive security automation framework integrating Subfinder, Nmap, Nuclei and SQLMap into a unified pipeline, automating subdomain enumeration, port scanning, vulnerability detection and reporting.
- Implemented real-time Telegram scan notifications and structured logging for remote monitoring of active scans.

Reflective XSS Scanner | Python, Multithreading | github.com/CyVenom/Reflective_XSS

- Built a multithreaded XSS detection framework testing 10,000+ payload variations across multiple web endpoints.
- Implemented automated payload testing and response analysis to find reflected XSS across 3 test environments.

CERTIFICATIONS AND COURSES

- CompTIA Security+ and CySA+ Assessments (Coursera course assessments)
- IBM: Introduction to Cybersecurity, Computer Networks & Network Security, Operating Systems Security
- AWS Academy Cloud Foundations; Cisco: Introduction to Cybersecurity

EXTRACURRICULAR ACTIVITIES

Speaker, Barcamp MMU | Sep 2024

- Delivered a session on web application vulnerabilities, covering subdomain enumeration, XSS testing and disclosure.

Participant, Ethical Hacking Workshop, IT Society MMU | Sep 2024

- Hands-on training covering XSS detection, port scanning, Burp Suite workflows and OWASP Top 10 exploitation techniques.

Participant, Barcamp MMU | Dec 2023

- Networked with security professionals and discussed CVEs, ethical hacking tools and attack techniques.

LANGUAGES

English (fluent) | Malay (fluent) | Tamil (fluent)
